

## Original Panel – Technical Specifications

Profile:	
Code:	ORG PNL 750 x 170 x 40
Dimensions/coverage:	750mm wide x 170mm high x 40mm thick (max)
Material:	Western Red Cedar
Description:	Original Panel is made primarily out of the off cuts of cedar produced in the general milling of cedar profiles. These are machined, sanded and glued together in various configurations. The timber thicknesses of the individual off cuts are 12mm, 18mm, 30mm and 40mm. Panels are designed to be run either horizontally or vertically in a 'brick' format.
Finishes Available:	Raw, Satin Clear Coat, Teak Stained, Walnut Stained, Black Japan, White Wash – refer to images below.
Panels per m2:	8
Weight per m2:	Approx 9.2kg
Recommended Fixing:	Flexible builders adhesive (ie equivalent of Bostik Ultraset SF) applied with a notched trowel on a clean substrate.
Application:	Out of weather application for all prefinished options. Raw finish can be used in outdoor areas subject to use of recommended adhesive.

*Raw Cedar*

*Satin Clear Coat*

*Teak Stained*
